

## Replacement – The four most important characteristics:

- **SAVE COSTS** – no need to rewrite the data stream
- **UNIQUE** – the controller processes PCL5e on thermal printers as well as ZPLII on laser printers
- **FLEXIBLE** – the controller enables the creation and uploading of standard templates after which all necessary variable information (production data, serial numbers, etc.) can be sent , any aspects not solvable as standard will be developed to specific customer requirements by us
- **FUTURE PROOF** – thanks to the controller, system upgrades (e.g., SAP , etc.) can be easily realised

## Retail

Retail Clothing Swing Tags and Labels

## Retail

Specialist Printing Requirements on Synthetic Media like Yupo
